Experience & Portfolio

If you want to know more about what I do previously, from here I will explain more detailed about what I did and made in my last 7 years of experience

2020-2021 (1 year in this position, 3+ years in the company)
Product Manager & Lead Frontend
at PHI Integration (Xeratic)

Industry	Information Technology
Business	Data Management & Analytics
Role	Product Manager
Level	Manager – Team Lead

As a Product Manager my responsibilities are:

- Create product development plan and timeline
- Communicate with stakeholders regarding the product
- Create product design based on product owner's vision
- Review and research on the technology stack used
- Assign tasks and manage team

As a Lead Frontend my responsibilities are:

- Creating UI prototype based on use case requirement
- Make analysis on UX and possible improvement
- Create framework for Frontend site development
- Manage team and assign tasks
- Code the frontend side scripts
- Sometimes make icons and animation for UI

Technology stack used	HTML / CSS / Javascript (ReactJS) / PHP
Framework	Bootstrap / create-react-app

2018-2020 (2+ years)
Lead Frontend & UI/UX Designer
at PHI Integration

Industry	Information Technology
Business	Data Management Services
Role	Lead Frontend & UI/UX Designer
Level	Senior - Technical Lead

PHI is data management service company with a vision to create product on data sector. PHI currently have 2 products:

Xeratic (Data Analytics Platform) | not launched yet

DQLab (Data Education Platform) | https://dqlab.id/

As a Lead Frontend my responsibilities on both products are:

- Creating UI prototype based on use case requirement
- Make analysis on UX and possible improvement
- Create framework for Frontend site development
- Manage team and assign tasks
- Code the frontend side scripts
- Sometimes make icons and animation for UI

Technology stack used   HTML / CSS / Javascript (ReactJS) / PHP

Framework   Bootstrap / create-react-app / nextJS

2017-2018
Self Employed

Industry	Information Technology
Business	Project Based Web Development
Role	Full stack and team lead

I work full stack and handle mostly everything myself (for some part I hire freelance to help me code, for ex: the admin CMS, and sometimes for website design [image only])

Here are some websites I develop during my self-employment period:

- carpetshop.co.id
  carpetshop are ecommerce site selling carpet

Technology stack used	HTML / CSS / JavaScript (jQuery) / PHP / MySQL
Framework	Bootstrap / Code Igniter

Links: https://carpetshop.co.id

- TRK Valves Company Profile
  a company profile for Valves Manufacturing Company based on Indonesia and Italy

Technology stack used	HTML / CSS / JavaScript (jQuery) / AngularJS / PHP / MySQL
Framework	Bootstrap / Code Igniter / AngularJS

Links: https://trkvalves.com

- Nutrigrain.co.id
  a company profile with shopping cart features to checkout and buy product

Technology stack used	HTML / CSS / JavaScript (jQuery) / PHP / MySQL
Framework	Bootstrap / Code Igniter

Links: https://nutrigrain.co.id/home

- Kusuma Beauty Clinic
  a company profile and product catalog for Kusuma Beauty Clinic

Technology stack used	HTML / CSS / JavaScript (jQuery) / PHP / MySQL
Framework	Bootstrap / Code Igniter

Links: https://kusumabeauty.id/home

2017 (1 year in this position, 3 years in the company)
Chief Technology Officer
at Compro.id (PT. Compro Kotak Inovasi) / Subsidiary of Squareone

Industry	Information Technology
Business	SAAS
Role	Chief Technology Officer
Level	Managerial (Co-founder)

On 2016 Squareone (My previous company) merged with another company to make a product and a new company Compro.id.

Compro is a mobile app builder SAAS on the cloud, the mobile app are built using hybrid technology of Ionic Framework (AngularJS)

As a CTO my responsibility are:

- Design the product
- Defining product features and vision
- ERD and architectural design of the product
- RnD on the technology to be used
- Make development plan, timeline, and risk management
- Assign tasks and supervise project

Aside my role as CTO I also handle all design and Frontend Code (in HTML/CSS and AngularJS) as well as branding of the product

Technology stack used	HTML / CSS / JavaScript (AngularJS) / PHP
Framework	Bootstrap / Laravel / AngularJS (Ionic)

Links: https://compro.id/

2015 -2017 (3 years)
Lead Frontend & Designer
at Squareone (PT. Kotak Pratama Solusindo)

Industry	Information Technology
Business	Software Development
Role	Lead Frontend & Designer
Level	Managerial (Co-founder)

As a lead frontend and designer of the company I am responsible with designing websites for clients as well as the code in html/css. I am also responsible with all branding and design of the company

The language used	HTML / CSS / JavaScript (jQuery) / PHP
Framework	Bootstrap / Laravel / Code Igniter
